

### **SAFE Program**

The SAFE Program is an Emergency Fuel Response Program as well as a Fuel Maintenance Program.

**The Emergency Fuel Response Program** is a unique disaster program which includes priority service 24/7, providing prompt, scheduled, fuel deliveries. Throughout any unexpected outage or during any adverse conditions, we will be there for you regardless the length of the crisis.

**When you need us the most...we will be there for you!** During power outages, diesel fuel supplies are delivered first to customers who are in the SAFE program, before allowing any other customers to receive supplies. In the history US Power & Environment we have never failed to make a delivery to our SAFE customers.

### **The Fuel Maintenance Program**

Scheduled, quarterly, fuel top-off for water prevention and maximum run time assurance.

No delivery charge when we top off your fuel (in certain areas of the world only).

Filter fuel for water and sediment removal

Fuel treatment with stability and biocide additives for fuel aging and algae prevention.

Annual testing, where a sample is taken and sent to a lab to be analyzed.

The assurance we are taking care of you

The fuel maintenance program also serves to extend the life and reliability of your generators.

**Everything listed below, is included in the SAFE Program for one monthly fee.**
